

# 3D THERMO JQX

The New 3D Thermo JQX , incorporates Raco's long tradition of understanding weaving patterns and constructions by adding the comfort technology of 37.5 we are able to weave the fabric together from shell to 37.5 yarn as insulation to lining all in 1 fabric.

By doing this we create a warm pocket camber to trap heat in between the shell and lining for better warmth, light weight and stretch comfort.
