We Nordic Label Studios is your partner in delivering additional branding. We pledge to deliver conscious Danish design, and to work with the most creative people. We give small design details the most impact.

Our approach of helping our customers desire to choose the right products is to constantly showcase the latest developments and new materials.

We continue to expand this approach to new materials with the right certifications.

We offer woven and printed labels with OEKO-TEX STANDARD 100 - GOTS - and FSC certifications.

Many of our other materials such as jacron, metal, silicone, lurex yarn and embroidery yarn are also OEKO-TEX certified from our sub-suppliers.

We make woven labels from Global Recycled Standard certified yarn. The recycled polyester yarn comes from e.g. re-used garment and waste materials.

Our labels in organic cotton is with GOTS-certification. Organic cotton labels are printed labels, and the ink we use in production meet all the standards for garment production in the EU.

We also offer a combination of recycled polyester and organic cotton labels, which gives a nice soft touch and look. Your logo is printed on the label and will appear very sharp.

Our hangtags are made of FSC certified paper and recycled paper. We can also provide a unique hangtag printed in Denmark using 100% wind energy, printed with vegan colors on European recycled paper.

We make hangtags in many unique materials such as stone paper, grass/plant fiber, bamboo paper, wool paper.

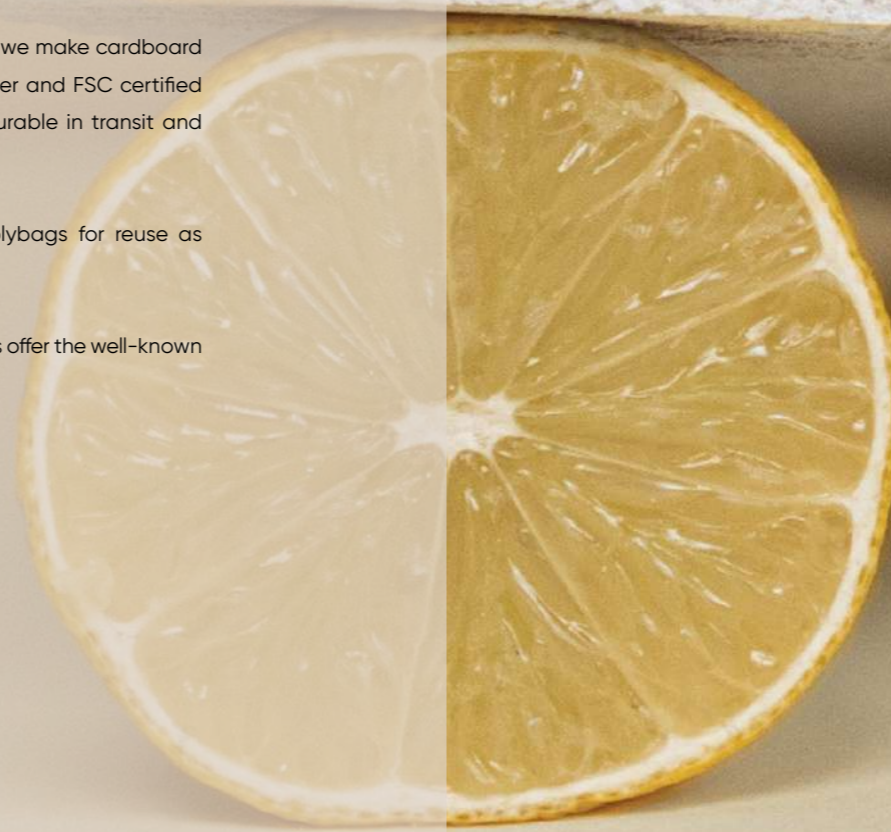

For printing we can also use soya ink.

For your e-commerce webshop we make cardboard boxes made from recycled paper and FSC certified paper. These are strong and durable in transit and can withstand most handling.

We can also offer recycled polybags for reuse as shipping bags.

In WE NORDIC we strive to always offer the well-known articles in a certified version.
