

ALGAE DYED YARNS

- **Environmental impact:** resonating with eco-conscious buyers.
- Enhance your **brand image:** differentiate your brand in a crowded market.
- **Superior performance and quality:** gentle, long-lasting colours with the same colour fastness properties as standard dyed yarns.

- Algae dye saves 98% water compared to conventional dye production and 70-74% of green house gas emissions compared to conventional dyes & ink production.
