

TECHNOLOGY PRESENTATION

# Innovative Product Development

Transfer of material and technology know-how

---

PERFORMANCEDAYS, 05.11.2014

## About MRC

MRC researches across sectors for material and technology solutions to be utilized in the development of innovative products

The company's core focal point is individual **materials and technology research** and the subsequent downstream **project management** alongside the product development phase.

Besides a unique materials and technology experience across various industries, MRC also has contextual understanding for the **integration of sustainability aspects into product development**.

Tailor-made **workshops and lectures** serve development, design, marketing and management departments as sources of inspiration and information for the use of innovative materials and processes.
