MID AIR

A delicate color palette
as light as a feather.

A fragile and refined
vibrancy is in the air.
Graphics delight in
infinite spaces and
open horizons.

color illustration by C.I.A.

In the most intimate sense of the term, **MID AIR** represents a way of gliding, finally light, within ourselves.

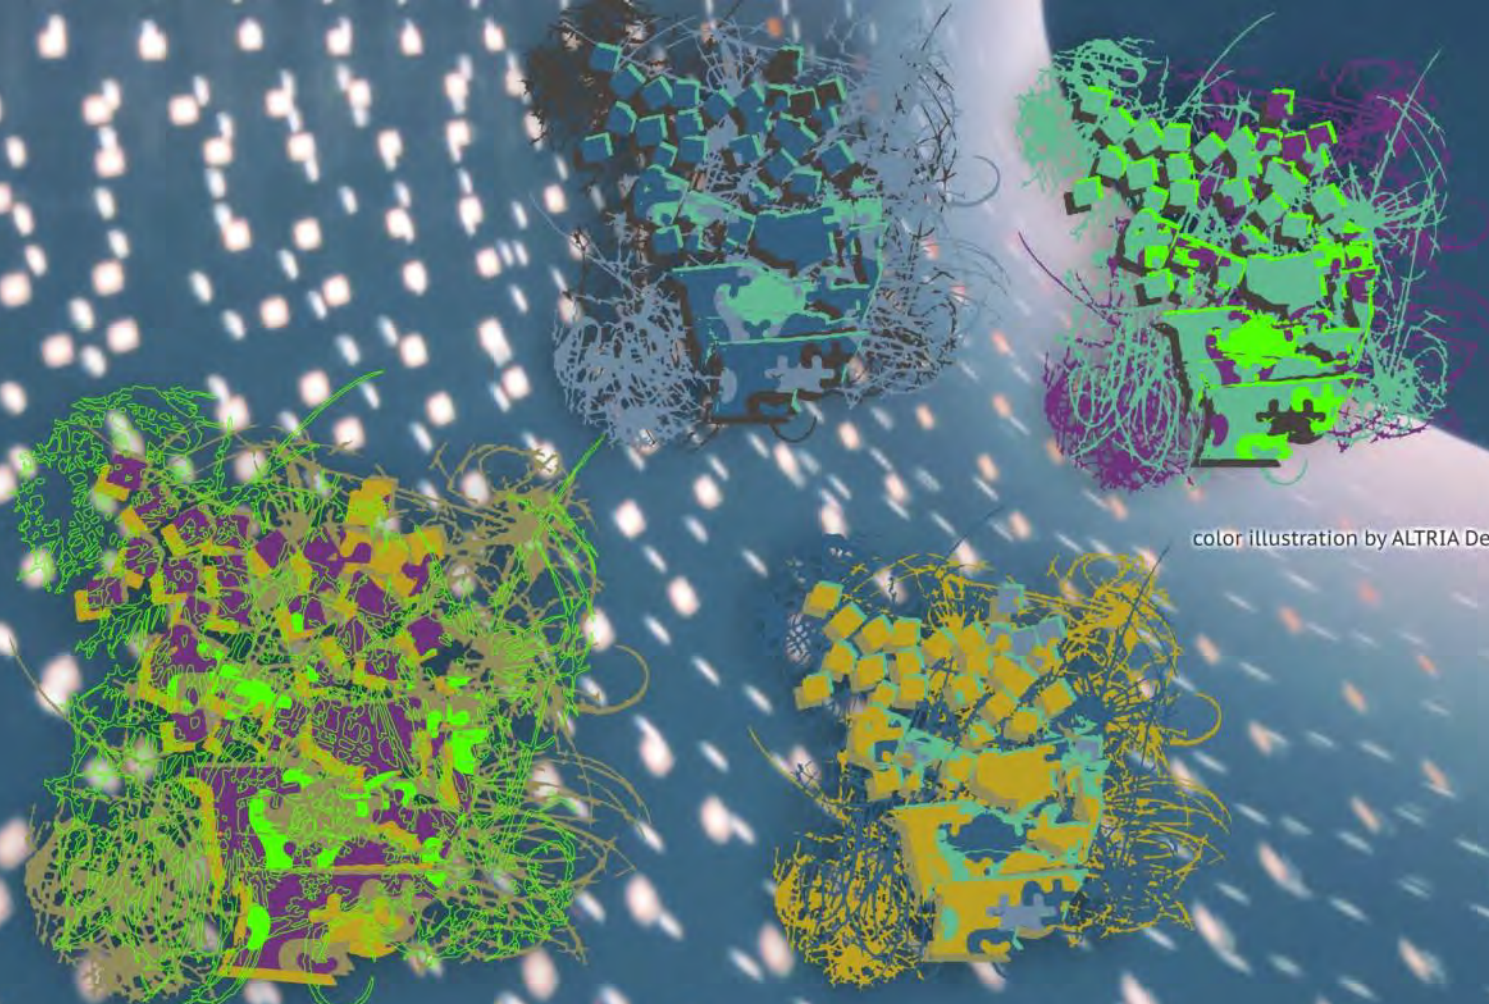

Mirella Becucci, C.I.A.

Immersive experiences are constantly gaining ground. Users may navigate alternate worlds and their infinite possibilities of interaction.

CUT LOOSE

In between extremes and out of scale –
like a dance on the volcano. Risky collisions
and manipulated dissonances. A vibrant
chaos - shifting views.

Let's start doing it right!

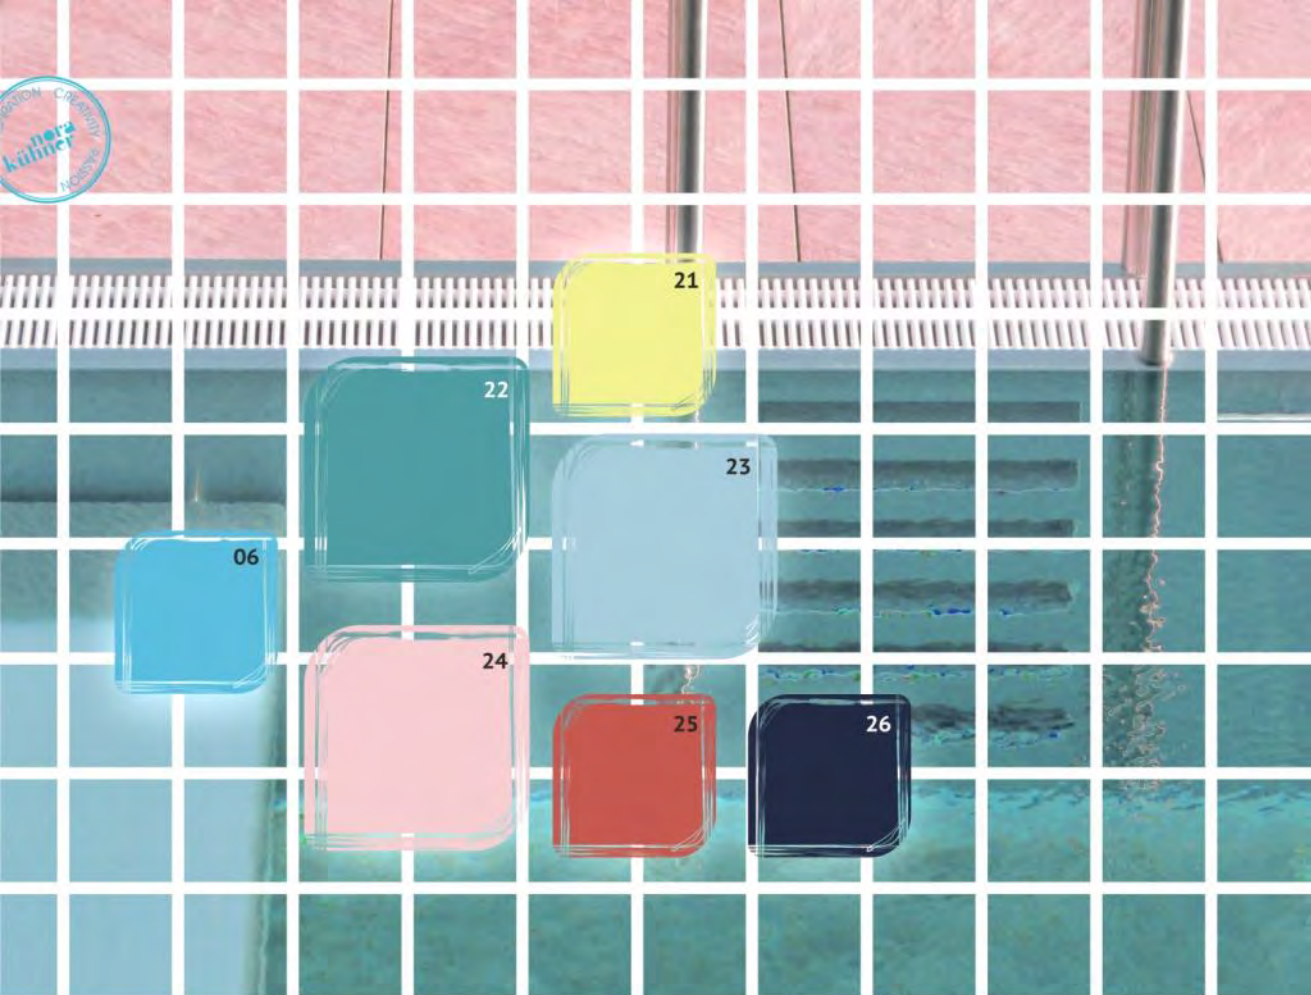

Disorder and manipulation are key to eye-catching colorful graphics. Patterns delight in spinning motion.

WHERE SYMMETRY UNFOLDS ...

Perfect compositions and symmetries – sublime beauty or sheer boredom?

The human ambivalence: We like the well-ordered. On the other hand side we are permanently in search of newness and want to break bland uniformity.

Transparent layers of abstract patterns draw inspiration from nature. Exerting a fragile beauty which reflects the ongoing ecological concerns about the extinction of plants and animals.

Fabrics opt for purity and clarity instead of blending and mixing. Surfaces go for a natural silky sheen and smooth handle.

SPLENDID ISOLATION

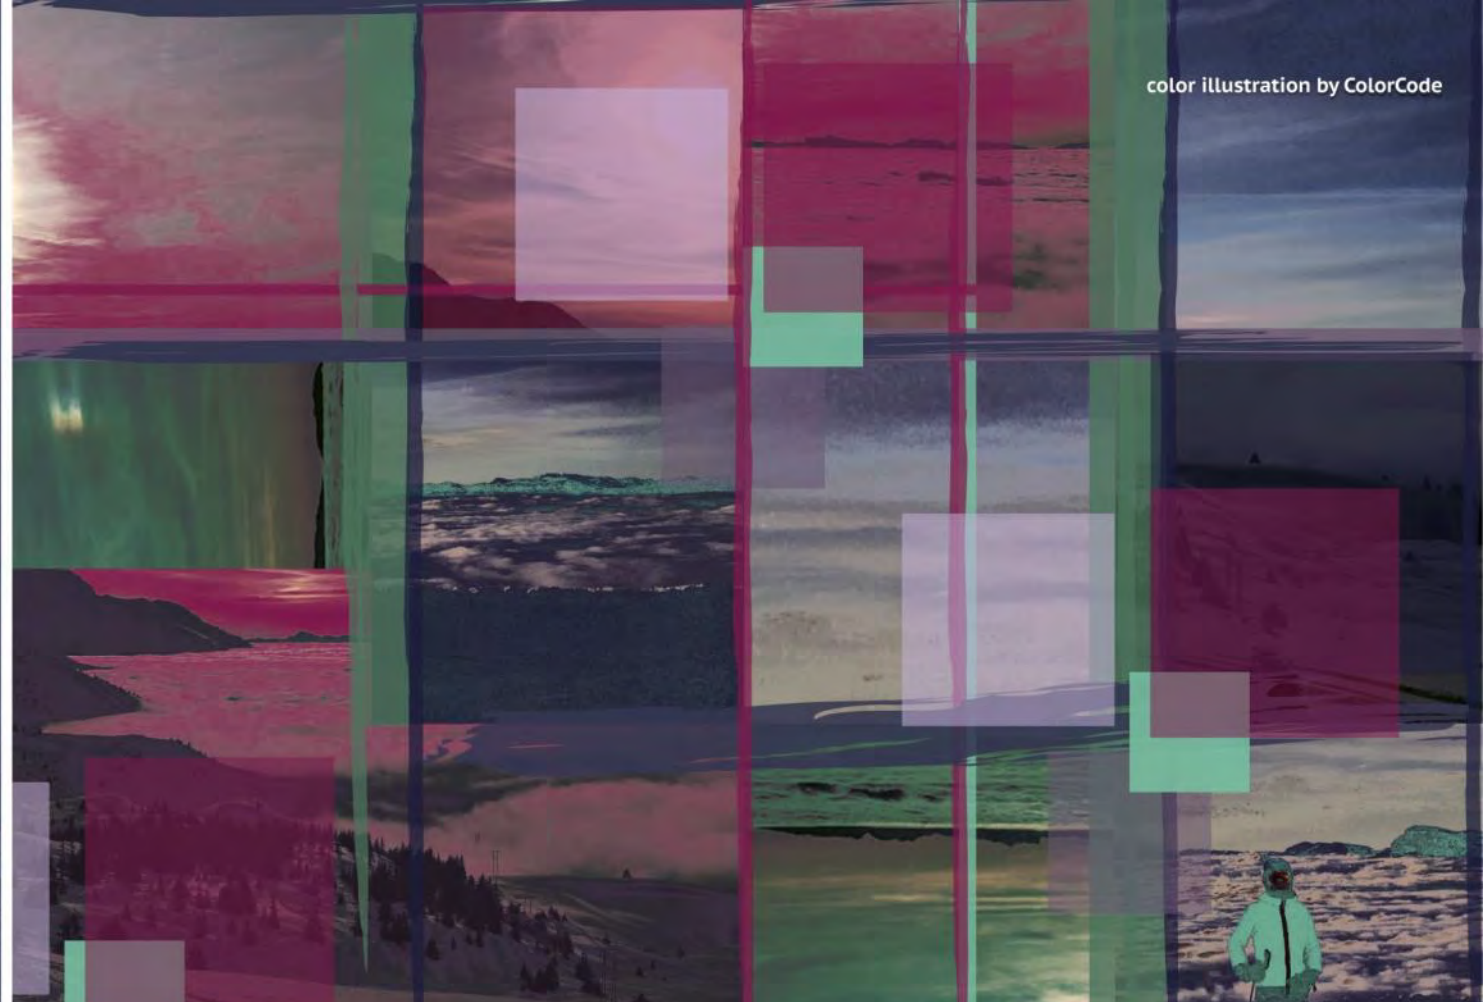

An intense atmospheric feel – both uncanny and strangely familiar. However, the saturated and rich hues resonate with lustrous darkness.

Please note:

By mid of May 2020 the **early color information for summer 2022** will be available at the **PERFORMANCE DAYS** website. Alongside with the first graphics, this early color information provides all the color codes from Archroma, Coloro, CSI DyStar and Pantone.

Furthermore you get the overview of washing and light fastnesses for the whole color range.
